

Edward Gajdosik | Superintendent

Eddie works diligently with our Superintendents and Trade Partners to maximize resources so that the project completes safely and on time. He understands the project plans and specs, has excellent stormwater and SDS management, and takes a leadership role in infection control and pedestrian routing. Keeping a great relationship with our supply vendors, he focuses on the swift delivery of materials. Last, Eddie pushes for punch list corrections until the project is precisely what the stakeholders envisioned.

EDUCATION

Wisconsin Stout Construction
Management Program
